▪ Background

Tracey has 26 years experience in production management for architectural drawings. She is accustomed to handling projects on tight deadlines and is detailed oriented. Her experience includes serving as estimator and project manager for local construction companies in which she calculated material and equipment bids. She has:

- been involved in all aspects of preparing sets of working drawings utilizing AutoCAD
- worked on private, public, federal, state, commercial and residential projects
- incorporated value engineering while maintaining code and accessibility requirements
- communicated and coordinated with all trades, owners, and contractors
